Hatteras M90 Panacera

The M90's styling makes it an instantly recognizable member of Hatteras' Motor Yacht family. The open-concept interior includes a new option: the builder's first hydraulic balcony, and the atrium skylight first shown on the M75 is even bigger here, filling the interior with light. The M90 also introduces the HattCON ship management system, which integrates navigation, monitoring and automation functions into a simple touchscreen.

Horizon FD85

Horizon's new FD range represents a styling departure for the Taiwanese builder, with a plumb bow and floor to ceiling windows fronted by cut-out bulwarks for even bigger views out. The fast displacement hull gives the FD85 efficiency over a range of speeds and her wide beam means tremendous interior volume. Hull No 3 will be in the US and it features a main deck master and warm anigre and walnut throughout.

Muchos Mas

Muchos Mas is "much more" than a beautiful tri-deck superyacht. As the first new Crescent for more than a decade, she marks the return of the Canadian brand after a troubled period. She boasts a foredeck spa pool, a main salon bar that extends to the aft deck, four guest staterooms and a spacious main deck master. See our feature on page 98.
